PROFESSIONAL SUMMARY

Computer Systems Technology student with hands-on experience building and supporting web applications and databases, troubleshooting computer problems, and installing and configuring software. Detail-oriented and quick to learn, and works reliably in safety-focused, procedure-driven environments. Pursuing a career in identity and access management and cybersecurity, and motivated to help protect access to the systems that support patient care in Alberta's healthcare system.

TECHNICAL SKILLS

Systems & Troubleshooting	Windows, Linux, Microsoft 365 (Word, Excel, PowerPoint), Hardware & Software Troubleshooting, Software Installation & Configuration, Technical Documentation
Programming & Tools	Python, Java, C++, JavaScript, TypeScript, PowerShell, RISC-V Assembly, Visual Studio
Web, APIs & Databases	Next.js, Django, HTML, Tailwind CSS, Google Calendar API, SQL, PostgreSQL, Database Design
Digital Systems	Computer Architecture, Digital Logic, Tinkercad
Professional	Problem Solving, Attention to Detail, Verbal & Written Communication, Teamwork, Adaptability

EDUCATION

Diploma, Computer Systems Technology — Jan 2024 — Dec 2026 (expected)
Northwestern Polytechnic, Grande Prairie, AB

Secondary Education — Mar 2023
Dasmesh Parivar International School

PROFESSIONAL EXPERIENCE

Full Stack Developer — 2025 — Present
Elevate GP

- Build full-stack web applications for local business clients using Next.js, TypeScript, Django, and PostgreSQL, including custom booking systems built on the Google Calendar API with admin portals
- Debug and resolve issues across front-end, back-end, and database layers
- Diagnose and resolve computer hardware and software problems, and install and configure software
- Provide post-launch support to clients, answering questions and troubleshooting website issues, including by phone

Reliability Support Worker — 2024 — Present
Weyerhaeuser

- Adhere to safety procedures and work schedules as a general labourer in a high-paced industrial sawmill
- Communicate with supervisors and team members to meet daily goals, adapting to changing tasks in a fast-paced environment

Parks Labourer (Arborist Support) — Summers 2025 & 2026
City of Grande Prairie — Parks Department

- Assisted arborists with tree trimming, brush cleanup, and equipment operation
- Maintained public parks and trails; reported daily tasks and safety concerns to the lead hand

Sales Associate — Feb 2024 — Aug 2024
London Drugs

- Provided customer service and accurate product information to a diverse customer base, in person and by phone
- Contributed to promotional strategies that increased sales volume

PROJECTS

Ace of War — aceofwar.com
Designed a new website for a client and built its custom booking system (Google Calendar API) and admin portal.
Next.js · TypeScript · Tailwind CSS · Shadcn UI · PostgreSQL

True Value Mattress — tvmba.ca
Built a website and custom appointment booking system with an admin portal for a local mattress retailer in Grande Prairie.
Next.js · Tailwind CSS · PostgreSQL

Blue Sky RV Park — rvgp.netlify.app
Converted a course project into a live production website for an RV park outside Grande Prairie.
HTML · CSS · JavaScript

Computer Architecture Coursework — 9 labs
Built a computer from logic gates up across nine labs: comparators, decoders, latches, flip-flops, registers, memory, an ALU, and a single-cycle CPU running RISC-V assembly, plus a CPU simulator in Java.
Java · C++ · RISC-V Assembly · Digital Logic Design
