

Mansajandeep Singh

Grande Prairie, AB | 587-202-7997 | mansajandeeps@gmail.com | github.com/mansajandeep-netizen

Computer Systems Technology student (graduating December 2026) who builds everything on logic — full-stack code and digital circuit design. Currently developing production websites and booking systems at Elevate GP, and working as a reliability support worker at Weyerhaeuser. Detail-oriented and quick to learn, with a particular interest in IT operations and application support.

PROFESSIONAL EXPERIENCE

Full Stack Developer 2025 — Present

Elevate GP

- Build full-stack websites for local businesses end to end — design, front-end, and backend systems
- Developed a custom booking system for a client using the Google Calendar API, backed by a custom admin portal
- Work across Next.js, TypeScript, Tailwind CSS, Shadcn UI, Django, and PostgreSQL

Reliability Support Worker 2024 — Present

Weyerhaeuser

- Followed safety procedures and schedules as a general labourer in a high-paced industrial sawmill setting
- Communicated effectively with supervisors and team members to meet daily goals
- Demonstrated reliability and adaptability in a fast-paced environment

Parks Labourer (Arborist Support) Summers 2025 & 2026

City of Grande Prairie — Parks Department

- Assisted arborists with tree trimming, brush cleanup, and equipment use
- Maintained public park areas and trails, reporting daily tasks and safety concerns to a lead hand

Sales Associate Feb 2024 — Aug 2024

London Drugs

- Provided customer service and accurate product information to a diverse customer base
- Contributed to promotional strategies that increased sales volume

PROJECTS

Ace of War aceofwar.com

Designed a new website and built a full custom booking system using the Google Calendar API, with bookings managed through a custom admin portal.

Next.js · TypeScript · Tailwind CSS · Shadcn UI · PostgreSQL

Blue Sky RV Park rvgp.netlify.app

Course project that became a live production site for an RV park outside Grande Prairie.

HTML · CSS · JavaScript

Computer Architecture Coursework

Nine labs building a computer from the gate up — 4-bit comparators, BCD and line decoders, D latches and flip-flops, a mux-selected register with synchronous load enable, a decoder-addressed memory block, a full ALU, and a single-cycle CPU running RISC-V assembly — plus a CPU simulator written in Java.

Java · C++ · RISC-V Assembly · Digital Logic Design

EDUCATION

Diploma — Computer Systems Technology 01/2024 — 12/2026 (expected)

Northwestern Polytechnic

Secondary Education 03/2023

Dasmesh Parivar International School

TECHNICAL SKILLS

Languages	Java, Python, C++, JavaScript, TypeScript
Web & Frameworks	Next.js, Django, HTML, Tailwind CSS, Shadcn UI
Databases	SQL, PostgreSQL, Database Design
Systems & Architecture	Logic Building, Digital Logic, Computer Architecture, RISC-V Assembly, Windows/Linux, Hardware Troubleshooting
Other	Documentation, Microsoft Office (Word, Excel, PowerPoint)
